# List of guests

## Summer semester 2012

24/02/2012	Wolfgang Losert	University of Maryland	From waves to cell migration
22/05/2012	Volker Abetz	Helmholtz-Zentrum Geesthacht	Nanomaterialien auf der Basis von Blockcopolymeren
05/06/2012	Manfred Radmacher	Universität Bremen	Investigation of cellular mechanics by atomic force microscopy
19/06/2012	Stefan Klumpp	MPI f. Kolloid- u. Grenzflächenforschung Golm	Structure formation and motility in bacterial cells
19/06/2012	Anael Lemaitre	Universite Paris Est	Signature of flow and relaxation events in amorphous glasses and supercooled liquids under shear
03/07/2012	Reinhard Lipowski	MPI f. Kolloid- u. Grenzflächenforschung Berlin	Multiscale biosystems: Hidden dimensions of self-organization
17/07/2012	Timo Betz	Curie Institut, Paris	The mechanics of active and passive cellular assemblies: How biomimetic reconstitution can help to understand living cells
<b>Summer Symposium</b>			
19/07/2012	Alexander de Vries	University of Groningen	Lipids on the move: how realistic are molecular dynamics simulations
19/07/2012	Ralf Richter	Centre for Cooperative Research in Biomaterials, San Sebastian	Biomolecular hydrogels - Nature's playground for supramolecular chemistry and physics
