

Module M.Phys.1403 Internship

Module description:

- **Learning outcome, core skills:** After successful completion of the module, students should familiarise oneself independently in complex issues and perform tasks under guidance in team work. The students should be able to present the obtained results in a talk or as a poster.
- **Duration:** at least 180 hours
- **Admission requirements:** This module can be selected only on the recommendation of a lecturer.

Three options:

1. Work in one of the research groups of the Faculty of Physics
 - Examination: Posterpresentation (approx. 30 min.)
2. Work in an external research group (like MPS or equivalent)
 - no examination; you have to hand in the internship certificate, which should include the internship duration and weekly working hours as well as an overview of your tasks.
3. Internship in a company (like Bosch or equivalent)
 - no examination, you have to hand in the internship certificate, which should include the internship duration and weekly working hours as well as an overview of your tasks.
